EMAIL: welcome@goodafternoon.ro | SITE WEB: www.goodafternoon.ro

## Scurta descriere

Scopul acestui ghid este de a prezenta detaliile privind integrarea solutiei EasyBill.ro cu platforme externe prin API-uri.

Integrarea va fi facuta folosind serviciile web REST stateless expuse de EasyBill.ro. Cu exceptia serviciului de Login, toate celalalte servicii vor trebui apelate impreuna cu identificatorul sesiunii curente.

Pentru logarea in interfata EasyBill, pot fi folosite urmatoarele date:

- Utilizator: test@easybill.ro
- Parola: test1234
- URL: <https://apps.easybill.ro>

User API:

- Utilizator: test-api
- Parola: test1234
- Endpoint web service: <https://apps.easybill.ro/cgi-bin/index.cgi?action=plugin>

## Setare cont EasyBill

Pentru configurarea completa a contului trebuiesc furnizate urmatoarele date:

1. Date identificare firma: denumire firma, CIF, Nr Registru Comertului, Banca, regim tva, etc;
2. Elemente vizuale: sigla, sigla background;
3. Seria si indexul initial al facturilor;
4. Template factura;
5. Template email (optional)

## Good Afternoon Interactive

C.I.F.: 27384302 | R.C.: J40/8697/2010

IBAN: RO44INGB0000999902115301 ING Bank suc. Moșilor

ADRESA: Str. Râmnicu Vâlcea nr. 14 bl. 39A sc. 2 ap. 47, Sector 3, București

EMAIL: welcome@goodafternoon.ro | SITE WEB: www.goodafternoon.ro

## Metode de integrare

Exista doua variante de apelare a serviciilor:

- a) Varianta simpla
- b) Varianta complexa - cu adaugarea clientilor in DB si a produselor in nomenclator

In cazul ambelor variante, recomandam ca facturarea sa fie facuta in RON pentru a evita eventualele diferente de afisare a pretului datorate rotunjirilor sau a orei preluarii cursului BNR.

### *Varianta simpla*

Varianta simpla implica apelarea urmatoarelor servicii:

- 1) Login
- 2) Generarea facturii si adaugare produse
  - a) In RON
  - b) In EUR
- 3) Download PDF factura
  - a) Folosind sablon standard
  - b) Folosind sablon personalizat
- 4) Logout

### *Varianta complexa*

- 1) Login
- 2) Cautare client
- 3) Adaugare client daca nu exista
- 4) Genereaza factura si adaugare produse pentru clientul respectiva

### Parametrii servicii

#### Login: authenticateUser

Creaza sesiunea in aplicatia EasyBill. Returneaza parametrii necesari apelarii celorlalte servicii. Daca status = 1, din raspuns se memoreaza: AppUnique (identificatorul unic), UserId si SessionId. Acesti trei parametrii vor trebui trimisi ulterior pentru fiecare request.

#### Metoda

Get, Post

#### End-point

<https://apps.easybill.ro/cgi-bin/index.cgi?action=plugin>

#### Parametrii intrare:

Parametru	Descriere	Exemplu
mode(=api)		
Sec (=authenticateUser_fct)		
Username		
Passwords		

#### Parametrii iesire:

Parametru	Descriere	Exemplu
status		
SessionId		
AppUnique
